Lake Gardens, Kolkata- 700045

SUMMARY

I am a pre-final year B.Tech student in Electrical and Computer Engineering with a strong interest for AI, machine learning, and data science. I have hands-on experience in building and evaluating ML models, and I am keen to apply my skills in data analysis and model deployment through various academic projects and internships. I'm actively seeking opportunities that allow me to contribute data-driven solutions to real-world problems

EXPERIENCE

AI/ML intern

Edunet Foundation

06/2025 - 07/2025 Remote

Internship focused on AI and ML technologies

- Completed a 4-week AICTE–Microsoft internship focused on AI, ML, and Azure Cloud
- Built a supervised ML model in Python for cricket match outcome prediction, including data preprocessing, feature selection, and model evaluation

EDUCATION

Senior Secondary Schooling

Delhi Public School, Ruby Park

03/2009 - 04/2023 Kolkata

- Completed senior secondary education with a strong foundation in mathematics, science, and computer science.
- Actively participated in academic and extracurricular activities, developing discipline, problem-solving skills, and a consistent learning mindset.

B.tech, Electrical and Computer Engineering

Amrita Vishwa Vidyapeetham

08/2023 Coimbatore

- Pre-final year B.Tech student in Electrical and Computer Engineering with a strong focus on core electrical concepts, machine learning, data analysis, programming, and applied problem-solving through coursework and hands-on projects.

SKILLS

C/C++ Python HTML CSS
JavaScript NumPy Pandas
Matplotlib scikit-learn
TensorFlow Keras OpenCV
SQL Git GitHub
Visual Studio Code
Jupyter Notebook Canva Figma
FastAPI

PROJECTS

Movie Recommendation System

10/2025 - 11/2025

A movie recommendation system implemented using Python

- Developed a hybrid recommendation system combining fuzzy logic–based decision rules with an Artificial Neural Network for personalized movie suggestions.
- Processed user ratings and preferences to handle ambiguity and improve recommendation relevance.

Live Sign Language Transcription System

10/2025 - 11/2025

A system for ASL transcription leveraging deep learning techniques

- Implemented a real-time ASL transcription system using a hybrid RNN–LSTM model trained on a large gesture dataset.

Cricket Match Winner Predictor

03/2025 - 04/2025

Predictive model for cricket match winners

- Designed a supervised machine learning model for cricket match outcome prediction using historical ball-by-ball data, including feature engineering and model evaluation.
